Contee who sold him to me; he is a likely well made fellow about 21 years of age, 5 feet 10 inches high, his hands and feet are large; the evening before he abscended he had his hair cut close; he had with him a variety of clothing, viz. 1 blue coat and overals, one light colored bearskin coat and overalls, 2 swansdown waistcoats, 3 fine Irish linen shirts and some coarse shirts, three muslin neckcloths, a fine hat, price 7 dollars; he took away a prayer book, in the first page of which is written Mary Ducket.

JOE who calls himself Joe Grimes, alias Graham, and HARRY, both young negro men about 21 years of age—the clothing of these cannot be described. Among the various discoveries

which have of late been made in the United States, we know of none more deserving of public notice than the following by LEWIS DE NIROTH. Such a desideratum in the architecture of buildings has been long wanting. Many attempts have been made to compose or manufacture a chemical composition similar to that used by the ancient Egyptians; but we have heard of none which approximates nearer to that which is generally called the Egyptian cement and which has put at defiance the ravages of time for several thousand years, than that which the Patantee here describes.

Patent fire and water proof cement.

A composition equal in durability to free stone, for covering roofs, floors, and plaistering walls of houses—

Rendering Cellars that are marshy and damp water proof.

Chimney pieces.

Steps to front and back doors of houses.

Cement pavement entire for front and rear of houses, arches, and works under water, statues, images, &c. plaister out side of homes.
