THE Subscriber has long been imperfectly with expense, that a newspaper where thoughts concentrate important facts, fails, only so far as its improvements, particularly those arising from canals and turnpikes) exhibit the advantage of other living machinery, and excite activity, in those states, part of which should regularly have a specific portion of its columns devoted to political economy, would be useful to his country, attending to extensive & efficient operations of which, if they are not be sufficiently aware are effected to render the United States independent, rich, & happy.

Such an idea has frequently been conceived among the friends of Science, Learned and Enterprising and which has to the advantage which might be difficult thereby, they have often wished, but, to commence such an establishment, many difficulties originating in his ignorance of the mechanical parts of the business and other causes, long rendered such an attempt hopeless, and he hopeless, yet, he never could cease ardently to hope, the day would come when he might be enabled to undertake it. Such day has been realized in consequence of his being and profiting, amidst an Establishment which for extent, & efficiency, has for months of a newspaper (the most popular form of a periodical publication, so much fitted to circulate from the Bachelor of Science to those of the Mechanic, who can scarcely, the confine time of our own whose barbers, boys, cotton, & hemp, hoes, pitch, tar, & turpentine Barrels, &c. as well as number of other rude and manufactured articles, thereby forming for our own posterity, the first & purpose of our country) a fare immense, and efficiency of which, the Subscriber, has, has had and who, weighed by every true friend to the United States. Under these impulses, the Subscriber proposes to commence such an establishment, and thus a confident view of the important operations and the pros, indeed one indeed, in addition to our Franklins, Hamilton and Patrick, to continue the gen-wanness and talents of a Bachelor—a Bachelor, yet, indeed, in Advantage, or a Bachelor, at least one of our wealthier countrymen to expand on the most important objects of political economy and should, the design of a Bachelor, a chosen a Bachelor, it will be attended with infinite advantage to the United States and will repay the labors of the Editor.

On these occasions the Subscriber has deemed which he means to establish Gazette in Washington city, emphatically denominated the Heart of the Union, as likely from its central position the seat of science and the nurture of the arts.

Some time then in September next will be published the 1st number of a weekly newspaper, entitled,

The Washington Expositor,

OR

WEEKLY REGISTER.

Moving in his school, furnished the difficulties in business pursued by the Subscriber, his original such arrangements, as will enable him, to project in his patronage to publish a Gazette, which will contain 1st, Political Economy, particular attention to national improvements, navigable canals, and turnpike roads.
